

HEALTH, SAFETY & ENVIRONMENTAL VALUES

At AdvanSix, our core values of Safety, Integrity, Accountability and Respect are the foundation of our business. As a proud member of the American Chemistry Council, we are committed to managing our operations in a Safe, Stable and Sustainable manner in accordance with the Responsible Care® Guiding Principles. The following Health, Safety and Environmental values are intended to serve as a guide and reflect our commitment to continuously improve our health, safety, and environmental performance at all our sites in order to support sustainable operations.

Safety as a core value

We are committed to operating our facilities in a safe and secure manner and accept responsibility for our own personal safety and for the safety of our colleagues and the communities in which we operate. Our expectation is zero injuries.

Integrity and Compliance

We are committed to operating with integrity as individuals and as a responsible corporate citizen and will meet or exceed all applicable Health, Safety, Environmental (HSE), Security, and Process Safety Management (PSM) regulations, company standards and voluntary initiatives to which we subscribe.

Protection of our environment

We are committed to operating responsibly and implementing sustainable processes and practices that mitigate environmental impacts from our operations, products, and services.

Engaging stakeholders and maintaining a dialogue

We are committed to understanding, addressing, mitigating, and communicating the health, safety, environmental, security and process safety impacts of our raw materials, operations, and products throughout their lifecycle. We engage in an open and honest dialogue with employees, business partners, public authorities and our communities to discuss their concerns, present our actions and communicate results.

Continuously improving the performance of processes and products

We are committed to continuously improving our HSE, Security, PSM and Sustainability processes by using our management system to measure our ongoing performance, monitor sustainability metrics, set improvement goals, and drive continuous improvement action plans. We seek to continually enhance our role in global supply chains by innovating and delivering essential products for our customers and communities.

Implementing training and processes to ensure adherence

We are committed to providing all employees with the critical skills and training required to ensure adherence to these values and to make continuous progress towards our goal of no accidents, injuries or harm to human health and the environment. We engage and empower our employees to raise issues, participate in risk assessments, and support the implementation of process improvements throughout our manufacturing and business operations. We regularly verify adherence through assurance processes as well as internal and external audits.
